## THE SAFETYSTICK CHANGES THE CURBSIDE PARKING ENFORCEMENT GAME

Law enforcement agencies across the country are using Solar SafetySticks to deter, enforce, and prevent illegal parking—a problem that contributes to pedestrian crashes, blocked transit access, and congestion in busy corridors. The Solar SafetyStick is a proven, no up-front cost solution that helps municipalities protect residents, visitors, and first responders—24 hours a day. Solar-powered SafetySticks are installed at crosswalks, fire hydrants, school zones, intersections, and transit stops where illegal parking creates serious hazards. These patented, self-sustaining devices operate continuously to detect violations, document evidence, and transmit data directly to local enforcement teams via our easy-to-use cloud-based platform.

Founded in 2013, MPS manages tens of millions of parking sessions annually across the U.S. and Canada. As a pioneer of automated, fixed-camera, vision-based parking enforcement, MPS leads the industry in violation capture and collection. Leveraging AI, our patented technology platform has been engineered to maximize profits and optimize compliance in parking lots and garages of all sizes, as well as on public streets and restricted parking areas, delivering a comprehensive, end-to-end Parking-as-a-Service solution that has set the standard for automated, vision-based parking enforcement.

## Hard Drive Sanitization

Intimus North America announces new high-performance degausers and crushers designed for secure, on-premises data destruction. Manufactured in the United States and available for immediate shipment, the new Model 20000G is a 20,000 Gauss/ 2.0 Tesla degauser, complementing the degauser is the Intimus Hybrid Crusher. Both are National Security Agency (NSA) evaluated and listed on the NSA Evaluated Products List, meeting stringent government standards for the sanitization of classified media. The Hybrid Crusher features dual operation capability, allowing users to destroy hard drives by powered automatic operation or a manual hand crank mode—ensuring reliable performance even in environments where power is unavailable.

## Laboratory Fume Hoods

UniFlow AirStream low-flow high-performance fume hoods feature an exclusive all-composite resin construction that is chemical resistant, flame retardant, and lightweight and meets UL 1805, SEFA 1, ASHRAE 110, and ANSI Z9.5 standards. These hoods have a molded one-piece seamless composite resin interior fume chamber that has all-curved corners and is white for superior light reflectivity. The hoods are available in sizes from 30 inches to 96 inches wide and in depths of 24 inches to 48 inches and in CAV (air bypass) or VAV (restricted bypass) models. A wide selection of accessories and services are optional to meet exact user requirements.

## FEATURES

### Strategic Policy Leadership

Current, coherent, and consistently applied policies serve as an engine for officer safety, community trust, and defensible decision making, making them a core leadership imperative.

### The Limits of Duty

Policing has risen to meet wide-ranging community needs, but acknowledging its limits and the demand for other, better suited resources is critical for the future of the profession.

### Strengthening Sovereignty Through Policy

When legislative clarity, intergovernmental cooperation, and tribal sovereignty work in harmony, public safety is stronger and communities are better served.

### Grand Theft Cargo

Cargo theft, especially as conducted by transnational criminal organizations, is becoming a more pressing issue for transportation professionals, police agencies, consumers, and policymakers worldwide. Discourse among legislators and police leaders have revealed five key takeaways.

### Investigating Missing and Murdered Indigenous Persons

The crisis of Missing and Murdered Indigenous Persons (MMIP) is one of the most urgent and complex public safety challenges facing police agencies in the United States. The unique jurisdictional, social, and systemic challenges inherent in these cases often result in delayed responses and hindered investigations.

**Oklahoma City PD Expanding Its Wellness Unit**

The Oklahoma City Police Department's Wellness Unit is "expanding to provide more support to officers on the streets," [KWTU-TV](#) (5/29, Pierce) reported. It's been "operating for several years out of a small, 700 square-foot space that offers officers little privacy." Yet, the unit "averages 800 to 900 officers a year seeking mental health help, peer support or other wellness-related services to manage a stressful, life-threatening job." So, a building "close to downtown police headquarters...is under renovation." Officers and their families will have access to a variety of services at the new, 12,500 square-foot Cornerstone Wellness Center.
